**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 12/9/03.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Applicant's arguments filed 12/9/03 have been fully considered but they are not persuasive.

Rejection:

Claims 1-9 remain rejected under 35 USC 102 (a and/or b) as anticipated by or, in the alternative, under 35 USC 103(a) as being obvious over Weber '043 B1, Mann '964, or Carduck et al. '124.

*Note: All other rejections have been withdrawn.*

Response:

The applicants argue that Weber and Carduck do not teach an improved water retention capacity and better dimensional stability when used in building material compositions in comparison with conventionally produced cellulose ethers. In rebuttal, the applicants argue limitations that are not present in their own claims. For example, where in independent claim 1 is there a limitation for improved water retention capacity and better dimensional stability? These features are not present in the claims. Further, where is the experimental evidence that their water retention capacity and dimensional stability is improved over the prior art? Applicants provide no experimental evidence either supporting their allegation and thus it is not convincing.

The applicants also argue that Mann teaches cellulose ethers treated with a hydrophobicizing agent and their invention does not do so. Yet, the applicants still use comprising claim language which allows for the inclusion of unspecified ingredients in major amounts. Had applicants used more closed claim language such as consisting

of, it would have been convincing. However, since they do not, comprising can include a hydrophobicizing agent in their own invention.

The applicants argue that one of ordinary skill in the art would have been hard pressed to argue the claimed invention can be envisaged from the prior art. Yet, a review of the claims of Weber even show virtually identical claims, <sup>amounts</sup>~~amounts~~ of water and treatment steps and also teaches a polysaccharide derivative as a starting material. The examiner is not convinced by this statement either.

For the foregoing reason, the finality of this office action is now proper.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Marcantoni whose telephone number is 571-272-1373.
